

# Energy Policy

The sustainable use of resources is a key priority for BioSpring Gesellschaft für Biotechnologie mbH.

Within the framework of the ISO 50001-aligned energy management system, we pledge to

- define and pursue appropriate energy targets
- provide all essential information and resources required to attain the established energy objectives
- continuously enhance our energy efficiency and refine our Energy Management System (EnMS)
- comply with all legal obligations concerning energy use, consumption, and efficiency
- consider the needs and expectations of relevant stakeholders regarding energy usage, consumption, and efficiency
- consider energy efficiency when acquiring energy-relevant products and services
- factor in the potential for enhancing energy efficiency during the planning and design stages of energy-related facilities.
- encourage consciousness regarding our energy consumption and set a positive example as a company committed to energy efficiency
- ensure transparent and effective internal communication regarding the energy management system, critical energy consumption areas, and the achievement of strategic and operational energy objectives.
